MOTION IN SUPPORT FOR THE LATIN NOTARY IN ITALY

The Confederation of the Personnel of the Notaries in the European Union (La Confédération du Personnel des Notariats de l'Union Européenne) **CPNUE**, guarantees her support to all the people depending on the Latin Notary in Italy;

- To all employees and workers, who already lost by thousands their job due to the reform of the Latin Notary in Italy ; and who still will lose their job by thousands, because of the new law, when this law should become effective;
- To all notaries in Italy who, together with their cooperators, who are the victims of this reform, and will be greater victims after the voting of this law;
- To all people in Italy: also they will be victims, because of the fact, that legal security will no longer be guaranteed, because it will be no possible any more to lead a notary office in a decent way (with profits); which will result in less employment and less competent cooperators to handle the important and difficult dossiers;

Notaries and cooperators (and their whole families) are paying for this crisis, caused by some politicians, by their job, their health, their welfare.

They fear for the future:

- The future for employment;
- The future for their families and their welfare
- The future for the legal security
- The future for the public
- The future for the Latin Notary

Because:

- it's a complex world of contracts;
- There is no such thing as a simple contract.
- Every contract is different, and can not be handled by a draft or template; even if it is below the amount of 100.000,00 €,
 - o needs large research and legal knowledge
 - o need to be done in time
 - o need to be done with the highest precision and punctuality

Therefore **CPNUE**, guarantees her support to the Italian notaries and their employers, and insist to the members of the Italian Parliament, to fix a date for a meeting with a delegation of Italian notaries and employers, to discuss this event.
